

PREMIUM MSR

Mineral Surfaced Roll Roofing

Product Data

GMC PREMIUM Mineral Surfaced Roll roofing is Manufactured with a high quality Fiberglass mat and superior weathering grade asphalt coating for superior performance in all climate conditions.

Certifications

Manufactured to comply with: ASTM D 3909

USES

GMC PREMIUM Mineral Surfaced Roll roofing is a general purpose economical choice roll roofing product that can be used with cold adhesives or hot mopping applications for low slope roofs. Frequently used for residential low-slope roofing applications such as porches and carports or as flashing material, it is also used as cap sheet in the construction of build-up-roofs, as well as a superior performance tile underlayment.

Manufactured in the USA

Features and Benefits

- **Reliable** Fiberglass reinforced mat provides superior dimensional stability at time of installation.
- **Compatible** Approved and recommended for use in tile roofing applications.
- **Versatile** Manufactured to perform in all climate conditions and all types of structures.
- **Easy to apply** **No special fasteners required.** (Note: Plastic cap nails help seal around nail holes.)
- **Cost effective** Convenient roll size, **100 sq. ft. coverage with salvage edge**, minimizes job loss and excessive waste.
- **Required** Specified for use by architects, building code officials and primary roofing manufacturers.
Note: (Approved underlayment is required to validate warranty on most all roofing systems.)
- **Engineered** Manufactured with coating asphalt, Fiberglass sheet, and premium 3M granules for highest degree of ultraviolet protection.
- **Walk-able** Superior granule adhesion provides a non skid surface ideal for steep slope roofing.
- **Durable** Can be used as a primary roofing product, as well as a premium Tile underlayment.
- **USA Owned and Operated** Jobs for local residents, good for the economy. GMC is a proud supporter of several national and local charities.
