

RED ROSIN

LIGHTWEIGHT MOISTURE BARRIER

Product Description

GMC Red Rosin is a lightweight single ply kraft paper soaked in red organic dye. It is a recyclable product "Made in the USA". The organic fibers in the paper are resistant to substances bleeding through to the surface beneath. GMC Red Rosin provides the needed protection for many different surfaces during general construction.

**Manufactured in the USA
Producing American Jobs!**

Product Uses

GMC Red Rosin is used to protect surfaces from general construction such as foot traffic, wall and ceiling texturing, paint dripping, floor and tile installation, etc. It can be used as masking paper, flooring materials, wall construction materials, and many other applications. This building paper serves as a separation barrier, protecting against wind and dust intrusion while reducing squeaking. Before installing, all surfaces must be free of dust, dirt and debris to prevent the paper from being punctured. **GMC Red Rosin** is environmentally safe and made from 100% recyclable fibers. **GMC Red Rosin** is easy to install and remove, saving time and money.
